ENGINEERING GRADUATE OF THE YEAR 2020

Winner

Brogan MacDonald - Ramboll

Overview of entry

Brogan is a passionate Graduate Structural Engineer at Ramboll who has been demonstrated a devotion to sustainability, diversity and collaborative design. From project managing high profile clients to leading the corporate Women's Engineering Society partnership, Brogan has displayed enthusiasm for both engineering, inclusion and diversity and people development. As a keen STEM ambassador, she leads events, panels and mentors students to encourage young women a career in engineering. Brogan is also passionate about destigmatising mental health and designed sculpture 'Talk to Me' in Kings Cross for Mental Health Awareness Day.

Brogan is also a key member in the Ramboll UK Structures Sustainability Network and is currently leading a refurbishment project that aims to reduce demolition waste and creates interesting and innovative solutions to reusing structural steel in building refurbishments. Brogan was also recently named the Women's Engineering Society Top 50 Women in Engineering – Sustainability.
